Utility-Grade
EV Charging Solutions

Since 2008, NovaCHARGE has been providing leading utilities with secure, robust, scalable, and flexible solutions that enable demand response to be easily integrated into existing ADR and billing systems.

Stakeholders

Drivers
EV drivers expect ease-of-use and reliable charging

Site Host
Control Who, What, and When charges to help manage load within existing infrastructure
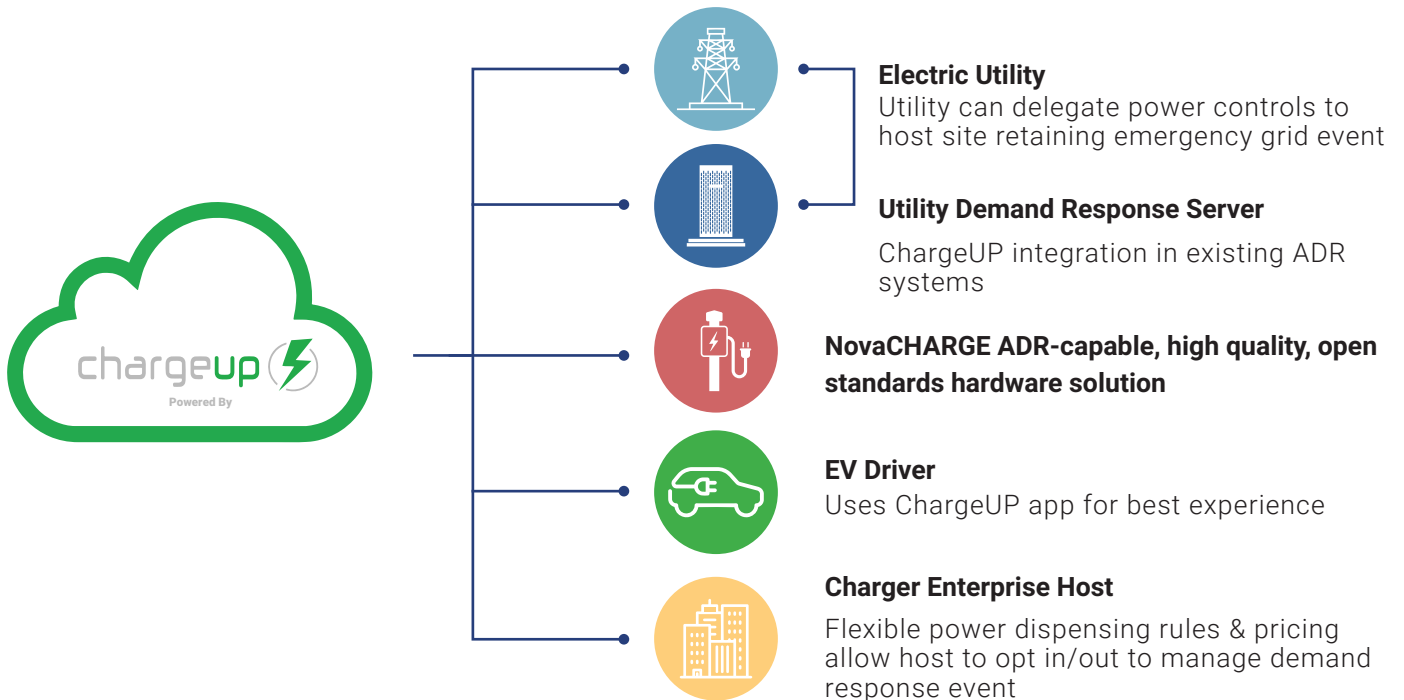

Utility
Grow revenue with reliability to ensure customer satisfaction

Hardware & Software Solutions support power management, and demand response as well as offering complete flexibility of business models. Complementing our best-in-class hardware is a next-generation network, ChargeUP. ChargeUP addresses the unique needs of utilities and enables emerging business models like CaaS (Charging as a Service). ChargeUP is supported 24/7/365 through our cloud-based customer service AI solution, NovaBOT, allowing industry-leading response to charger issues and driver support. Our leading-edge solution is self-healing and proactive for maximum uptime and reliability.

Have a Key Fob? Tap it on RFID Reader.

No Key Fob? Follow these instructions:
1. Download the free GREENLOTS App.
2. Connect charging cable and open the App.
3. Scan the QR Code or enter the Station ID.
4. Select Start Charging.
