

ClipperCreek Charging Station Access Control & Point of Sale Solutions

ClipperCreek offers the most innovative,
cost-effective Access Control Solution in the industry.

ClipperCreek's CS Series
with Access Control

Control your charging. ClipperCreek's CS series of charging stations now come with synchronous management from Liberty PlugIns. This unique system can be used as a simple access control or as a billing system for reimbursement of charging costs.

- Access Control—access codes generated at predetermined intervals (monthly, quarterly, yearly).
- Online Managed Account—users get codes delivered directly to their cell phone.
- Public Access Management—allow users to register an account online and bill their credit card for use of the charging station.

FLEET APPLICATIONS

Fixed Codes –

Codes assigned to individual users, or as needed, which can be updated based on a predetermined schedule.

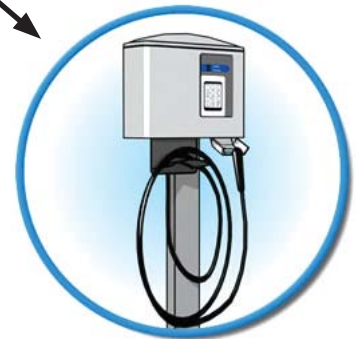

PARKING APPLICATIONS

Digital Pay Stations –

Digital pay stations such as those offered by Cale can be programmed to output activation codes valid for a fixed amount of time.

Parking system can now control parking as well as PEV charging.

Gated pay systems can be programmed to output a ticket with the appropriate code.

PUBLIC CHARGING

Random User –

Drivers can access their codes via text message or online. This gives the EV driver the flexibility of using any station at any time.
